Sir H. N. Reliance Foundation Hospital and Research Centre provides the facility to treat children with hematological and cancer-related disorders. At our hospital, we have highly experienced staff and a dedicated team of doctors assigned to take care of children with such disorders. Our doctors have worked extensively in their respective fields within the country and in some of the best centres abroad. Our staff is suited to handle any medical emergency and are available 24/7 for patient service.

We also have social workers and other family-centred services to take care of the various issues faced by the families of such children. We also work with the child’s referring physician and give timely updates about the progress on the child’s condition and consider them as an important part of the child care team.

TECHNOLOGY & INFRASTRUCTURE

- Isolation rooms (positive and negative pressure rooms) for immunocompromised patients.
- Sedation facility to do daycare procedures like bone marrow aspiration / biopsy / Lumbar puncture etc. so that the child has minimal or no pain during such procedures
- Play rooms especially for children to unwind and catch up on fun activities.
- Laminar Flow cabinets to prepare chemotherapy drugs under all aseptic conditions
- Personalized patient education sessions for patient / caregivers to make them understand the side effects and course of anti-cancer treatment.
- Palliative Care and Pain team / social worker services

SERVICES

Oncology

- All types of childhood blood cancers / lymphomas including high-risk and relapsed. We monitor the treatment response by minimal residual disease, which helps in modifying treatment and decreasing relapse / recurrence rates.
- All types of childhood solid tumours including difficult and rare tumours: Wilms’ tumour, Rhabdomyosarcoma, Liver tumours, Neuroblastoma, Brain tumours.
- All types of Bone cancers/Soft tissue sarcomas: Osteosarcoma, Ewing’s sarcoma, Spindle cell sarcoma.

Our After Completion Therapy clinic serves the needs of those patients who have completed their treatment by helping them to cope better and improve the quality of their lives. We also offer palliative care and have a dedicated Pain team, as well as social worker services. We have tied up with the leading international oncology centres to ensure our treatment protocols match the best international standards.

Hematology

- All kinds of Anemia including iron deficiency anemia, nutritional anemia, and other rare, difficult anemias.
- All kinds of Hemoglobinopathies including transfusion and non-transfusion dependent Thalassemia, Sickle cell disease.
- All kinds of Bleeding disorders including Hemophilia and Von Willebrand disease, with a multidisciplinary approach to prevent associated chronic morbidities.
- All kinds of Bone marrow failure syndromes like Fanconi’s and Aplastic anemia, and counselling regarding bone marrow transplantation.
- Other disorders like autoimmune Idiopathic thrombocytopenia and Neutropenias.
