Respect for Life  
सम्मान जिंदगी का

At Sir H. N. Reliance Foundation Hospital and Research Centre, we have a 40-bed facility for Day Care Services that offers surgeries, diagnostic procedures and treatments, and patients are discharged within 24 hours of admission. Thanks to technological advances in the field of medicine, a number of diagnostic, therapeutic and surgical procedures do not require prolonged hospitalisation, which makes Day Care Services a convenient option.

We ensure effective pre-operative preparation and conduct protocol-driven discharge. These are fundamental to safe and effective day care procedures and short stay surgeries. Patients are directly admitted, treated, and discharged from the Day Care Centre, saving them time from waiting in cumbersome queues.

Indeed, at Sir H. N. Reliance Foundation Hospital and Research Centre, we don't just treat the body, we go further: we respect life.

**DAY CARE SERVICES: Level 4, Tower, 8 am - 10 pm**  
Except Dialysis unit which is functional 24x7

## DAY CARE HIGHLIGHTS

- Admission and discharge from the same floor
- Minimum patient movement as all facilities are available on the same floor
- Dialysis facility available 24x7
- Satellite pharmacy on the same floor - for quick compounding and administration of chemotherapy drugs - reduces turnaround time for patients
- Private bays to ensure additional privacy and comfort

### DIALYSIS

Dialysis is performed on patients as per scheduled appointments. Along with open bays, there are private bays for patients who need additional privacy during the procedure. Isolation bays have also been provided for patients with a known history of transmissible infections.

### CHEMOTHERAPY

Chemotherapy procedures are performed as per scheduled appointments. There is a satellite pharmacy on the same floor for compounding the necessary infusions. Similar to the Dialysis unit, the structure of open, private and isolation bays has been maintained.

### PROCEDURES/SHORT STAY SURGERIES

We have a 19-bed unit for ambulatory procedures and short stay surgeries. Patients are admitted and discharged from the same floor. There is minimum patient movement since all facilities are located on the same floor. We have 7 dedicated procedure rooms on this floor:

- Endoscopy - 2 rooms
- Bronchoscopy - 1 room
- Minor Operation Theatre (OT) - 1 room - for minor procedures, dressing, suture removal, etc.
- Lithotripsy - 1 room
- Cystoscopy - 2 rooms

#### ENDOSCOPY:

We have 2 fully-equipped, modern endoscopy units with the latest endoscopes and supporting equipment:

- Gastroscope
- Duodenoscope
- Enteroscope
- Colonoscope
- Radial & linear Endoscopic Ultrasound Scope (EUS)

#### LITHOTRIPSY:

Our lithotripsy unit is fully equipped for non-invasive stone fragmentation of kidney stones using shock waves (Extracorporeal shock wave lithotripsy - ESWL). The procedures are performed using the latest equipment:

- Dornier compact Delta II Lithotriptor

#### BRONCHOSCOPY:

Our hospital has a modern bronchoscopy suite that is updated with the latest equipment for performing endoscopy of the airway:

- Flexible Video Bronchoscope
- Endobronchial Ultrasound-guided Bronchoscope
- Medical Pleuroscope
- Pediatric Bronchoscope

#### CYSTOSCOPY:

Our 2 cystoscopy units are fully equipped with the latest equipment for performing endoscopy of the urinary bladder:

- Flexible Cystoscope for quick assessment of urinary bladder
