UROLOGY

At Sir H. N. Reliance Foundation Hospital and Research Centre, our Department of Urology offers advanced treatment for a wide range of urological conditions. The department is a major referral centre and provides comprehensive diagnosis and treatment at par with international standards.

We have a highly dedicated team of experts in all subspecialties of urology, such as andrology, male infertility, female urology, paediatric urology, uro-oncology, laparoscopic urology and endourology. The team works round-the-clock to provide the best care. To support our urological oncology services, we also have devoted ancillary teams, like Physiotherapy (Pelvic floor), sexual rehabilitation, continence/bladder clinic etc.

The department collaborates with renowned international urological institutions for exchange of knowledge and technology, especially in advanced areas like robotic surgery.

Our uro-oncology unit works in conjunction with other oncological departments, such as surgical, medical, radiation, gynaecological and paediatric oncological services. Multi-disciplinary meetings are conducted on a regular basis to benefit patients.

Indeed, at Sir H.N. Reliance Foundation Hospital and Research Centre, we don't just treat the body, we go further: we respect life.

TECHNOLOGY & INFRASTRUCTURE

Meticulous planning has gone into creating world-class infrastructure and into procuring cutting-edge technology for the Urology Department.

We are proud to say that we are the first hospital in South Mumbai to offer the highly advanced, minimally invasive da Vinci Robotic Surgery. In addition, we also have the following equipment:

- Thulium Laser for Prostate Surgery (BPH) - 120 watts
- Holmium Laser - LISA Sphinx 100 watts (For Stones and Prostate - BPH)
- Urodynamic test - MMS Solar digital
- Flexible ureteropyeloscopy
- Dornier compact Delta II Lithotripter
- 180 Watts Greenlight high powered LASER for Prostate enlargement

UROLOGY: Level 3, Tower, 8 am - 8 pm

SERVICES

- Urological Oncology (Cancer surgery)
- Robotic (key hole) surgery
- LASER Surgery
- Laparoscopic (key hole) Urological surgery
- Kidney transplant surgery
- Extra corporeal shock wave Lithotripsy (ESWL)
- Stone surgery
- Prosthetic urological surgery
- Paediatric urology
- Urological Gynaecology
- Reconstructive Urology

NEPHROLOGY

Our Department of Nephrology provides comprehensive diagnosis and treatment for every stage of kidney disease at par with international standards.

We have a highly dedicated team of experts who provide holistic kidney care, and are well supported by other paramedical departments.

We firmly believe in a multi-pronged approach to control common, preventable and dangerous kidney disorders such as Chronic Kidney Disease (CKD). We put special emphasis on early detection, patient awareness and education, dietary advice and timely medical intervention. Our nephrologists, along with other supportive services, are available daily for consultation. Patients with conditions such as Diabetic Kidney Disease and Glomerulonephritis can also benefit immensely from the services offered by our Department of Nephrology.

- Flexible Cystoscopy for quick assessment of urinary bladder
- Dedicated ultrasound unit for obtaining prostate biopsies and to improve tumour detection during key hole kidney surgery

NEPHROLOGY: Level 3, Tower, 8 am - 8 pm

TECHNOLOGY & INFRASTRUCTURE

We have procured world-class equipment and cutting-edge technology for the Department of Nephrology. We've also ensured that the Department has a multi-disciplinary approach.

Our hospital is equipped with a Haemodialysis unit of international standards. We also have a vibrant Kidney Transplant programme to rehabilitate patients with advanced kidney failure. Outpatient nephrology services are targeted towards detection and treatment, including kidney biopsy.

SERVICES

- Management of urinary infections
- Kidney stone
- Hypertension
- Chronic kidney disease - multi-disciplinary approach
- Dialysis
- Kidney transplant
- Kidney biopsy
- ICU dialysis; Sustained low-efficiency dialysis (SLED)
- Rheumatology-nephrology clinic
- Cardio-Renal syndrome clinic

We also have a special team of doctors providing Paediatric nephrology care.

HAEMODIALYSIS UNIT:

Acute Kidney Injury (AKI) is a common problem in intensive care units. Our Department of Nephrology has the expertise to prevent and treat AKI in our ICU, along with a team of intensive care professionals. For critical patients, special dialysis, i.e. Sustained Low-efficiency Dialysis (SLED) is provided round-the-clock in the ICU by well-trained Haemodialysis Nurses under the supervision of the kidney specialist.

Other services provided by the Dialysis unit include:

- Plasmapheresis
- Hem-adsorption for poisonings
- Haemo-ultrafiltration for heart failure
- Liver dialysis
