

WORLD HEPATITIS DAY

28th July, 2016

A liver disease commonly caused by different viruses

SYMPTOMS

Yellow skin
& eyes

Fever &
fatigue

Loss of
appetite

Nausea/
vomiting

Abdominal
pain

PROTECTION

Hepatitis A & E are usually transmitted through contaminated water

- Cook food & boil water thoroughly before consuming
- Wash hands with soap & water before cooking, eating & after visiting the toilet

Hepatitis B & C are mainly transmitted through infected blood or unprotected sex

- Ask for blood or blood products to be screened for hepatitis B & C
- Use condoms during sex
- Get vaccinated against hepatitis B
