

Sir H. N.  
**Reliance Foundation Hospital**  
And Research Centre

Dear Colleagues,

We, at Reliance Foundation Hospital on behalf of the Department of Oncology Services take this opportunity to invite you to an enriching & interactive seminar on:

## Quality of Life: **THE FINAL FRONTIER**

If survival is the primary goal of all Oncologic endeavours, Quality of life is a very close second. Gone are the times when survivorship was the sole determinant of all efforts, research, refinements and innovations. In fact, as survival figures have reached a plateau in many instances, efforts to preserve, maintain and nurture Quality of Life have blossomed.

This meeting is designed to showcase exactly this. Saving a life is important! Yet bringing Quality of Life, Comfort, Normalcy and Productivity is equally germane.

*CME Points Applied*
